Welcome to Cambridge Memorial Hospital's Medical Day Care.

The purpose of this pamphlet is to give you information about the clinic, your treatment and the team who will be involved in your care.

The Medical Day Care clinic is an outpatient program that is open Monday to Friday, from 9:00 -4:00.

What can I expect from the Multi-Day Chemotherapy Model (MDCM) at CMH?

The MDCM is a process designed to reduce overall wait times during your chemotherapy treatments. (as part of a multi-day program) and improve safety.

This model divides visits into testing and case review on day one, and chemotherapy treatment on day two.

This ensures your case is thoroughly reviewed by your doctor and gives the pharmacist time to prepare the medicine that will be used to treat your cancer, making your chemotherapy treatment safer.

**Please bring all
medications with
you to every
appointment.**

**This includes all
over-the-counter
and prescription
medications**

Who will be involved in my care?

Your care team will include medical oncologists, oncological associates, registered nurses, and clerical staff. Dietitians and social work is also available for you. Your team will provide you with education in the form of verbal and written.

We encourage support for you during this time; family members and support persons can communicate with staff through phone, and social media platforms (eg. face time, google duo) during your appointments.
