

## Final Discharge Recommendations

### Colposcopy services: **Screening cessation for people referred to colposcopy with HPV-positive results at age 70 or older**

Colposcopist's name:

Contact information:

Patient information:

Date:

This patient is discharged from colposcopy. They no longer need cervical screening based on their age and risk of developing cervical pre-cancer (HSIL or AIS histology) and cancer.

For your records, this patient had a negative colposcopy (no high-grade lesion detected) at initial colposcopy visit.

For more information on the Ontario Cervical Screening Program's screening cessation recommendations, visit [ontariohealth.ca/OCSP-recommendations](https://ontariohealth.ca/OCSP-recommendations).

[Physician Name], MD, Colposcopist

Additional notes:

AIS = adenocarcinoma in-situ; HPV = human papillomavirus; HSIL = high-grade squamous intraepithelial lesion
